

**V-STEEL SNOW WEDGE ALL SEASON**

Designed for grader use in very snowy conditions, the VSWAS provides excellent performance in deeper snow. It also performs well in year round use and has design features that reduce stone holdings. Because VSWAS may be used year round, seasonal change-outs are no longer necessary.

**SPECIALIZED FEATURES**

- **DEEP SIPING** — Helps provide excellent traction, even late in tread life, which contributes to better braking and handling on snow and gravel
- **TIE BARS WITHIN THE SIPES** — Control movement of the tread blocks for long, even wear while combating the retention and throwing of damaging stones
- **GROOVED BEVEL** — Patent-pending grooves in lug walls enhance snow traction by shearing multiple layers of snow, not just the top layer
- **UNIQUE TREAD DESIGN** — Wide grooves and angled lugs help reduce retention and throwing of damaging stones, while contributing to a comfortable ride
- **CUT RESISTANT COMPOUND** — Reduces cutting, chipping and puncturing, extending the life of the tire
