

# W919™

*On-Highway Drive Position Radial*  
*Engineered Specifically for Wet, Slippery Conditions*

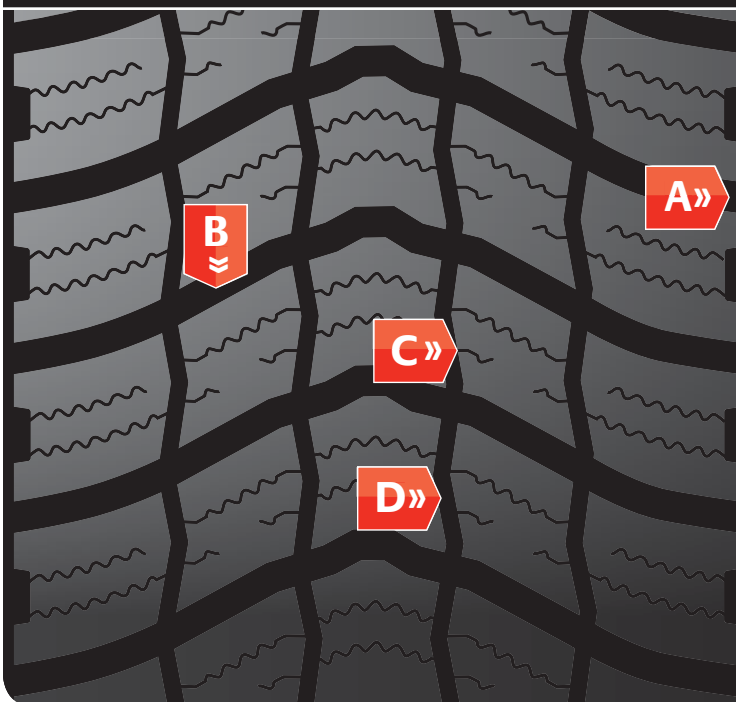

**Aggressive Traction ■ Durable Casing ■ Excellent Retreadability**

## PRECISELY THE RIGHT TIRE.

Built for the most brutal conditions out there. The Bridgestone W919 on-highway drive position radial tire is specifically designed for aggressive traction in heavy snow and ice. It's not only dependable, but supremely durable. Handling heavy loads with ease while delivering long tread life and excellent retreadability. Helping you keep a firm grip on the grueling demands of your business.

## W919 Innovations

**A**

### Directional, Open Shoulder Tread Pattern

Provides aggressive traction year-round throughout the original tread life of the tire.

**A»**

**B**

### Self-Cleaning Tread Design

Prevents buildup of snow and ice in the tread grooves, which maximizes grip.

**C»**

**C**

### Variable Sipe Configuration

Helps reduce tearing and irregular wear.

**D»**

**D**

### Narrow Grooves

Help combat the retention of casing-damaging stones, leading to increased casing life and better retreadability.

### Proven Tread Design

Modeled after Bandag BDR-W to offer proven traction and wear performance.

### Long-Wearing Cap Tread Compound

Combined with cooler running base compound for long wear life and maximum retreadability.

### Wide Tread Design

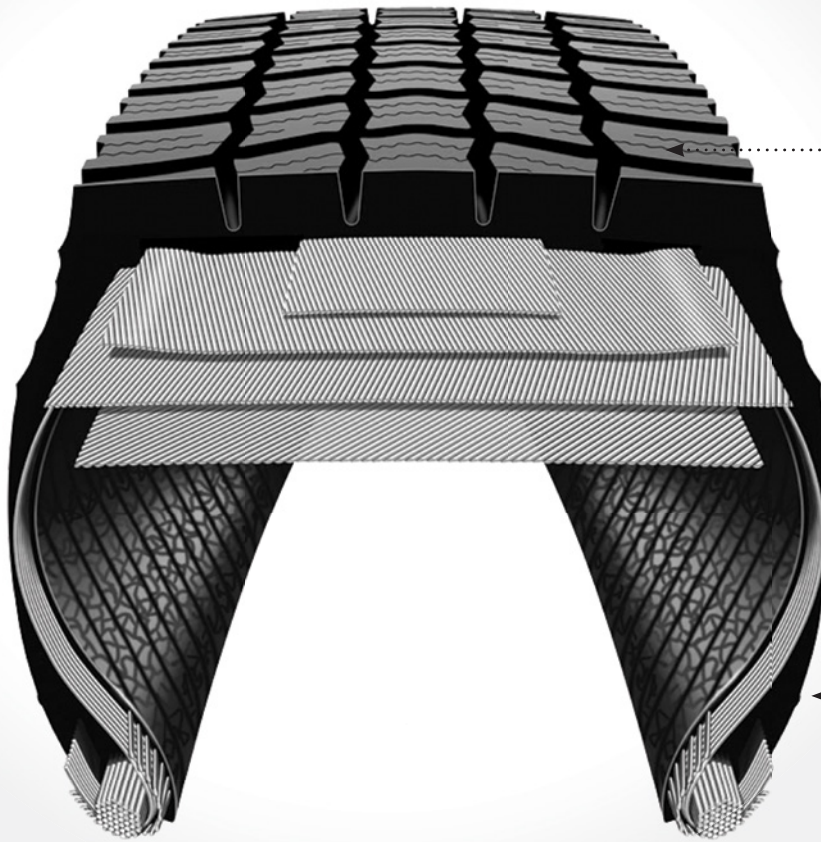

Promotes long wear life and added stability.

### Tough Sidewall Compound

Designed to resist cuts, tears and ozone damage.

### Reinforced Bead

A steel chafer helps strengthen the bead area for outstanding tire life and excellent retreadability.
