

# Tire Solutions

# Reduce tire-related downtime by up to 40%.\*

With Bridgestone Fleet Care's tire monitoring service, you can proactively address tire pressure issues to avoid downtime and keep your fleet running smoothly.

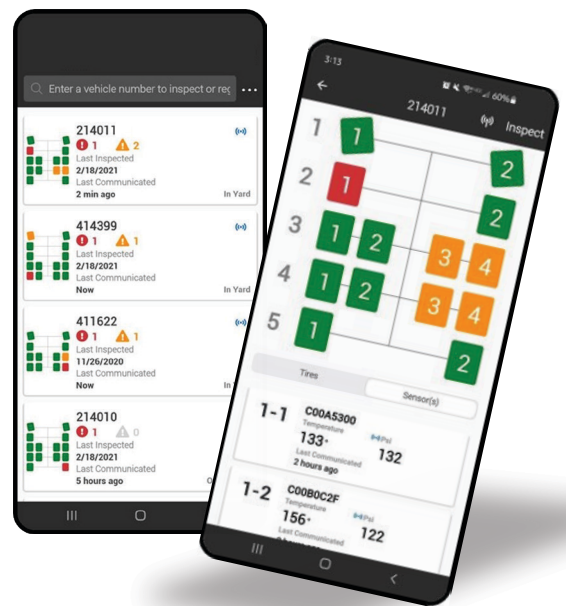

## Tire Monitoring

Bridgestone Fleet Care's robust tire pressure monitoring system is supported by software and components that are easy to install and use. Part of our comprehensive suite of offerings, it's designed to reduce tire costs, increase labor productivity, and keep fleets moving.

## Features & Benefits

- In-yard and real-time active TPMS monitoring
- Digital inspections
- Management platform with easy-to-use app
- Critical alerts
- Custom fleet issue data reports
- Technician task lists
- Use your own device (Android, iOS, Desktop)
- External and internal sensor options
- Proven weather resistance (-40° to 248°)

\*Data taken from an in-yard solution with a fleet of 43 trucks.
